

Table Layout

The diagram illustrates the layout of a table with four columns and five rows. The first row is a header row with columns labeled 'Item No', 'Item Name', and 'Quantity'. The data rows contain: (3231, Nail, 100), (532-A, Screwdriver, 3), (853ABU, Saw, 2), and (03920, Self-sealing stem bolt, 200). A yellow box labeled 'Select Table' points to a small square icon at the top left of the table. A yellow box labeled 'Column' is positioned above the table with a bracket spanning all three columns. A yellow box labeled 'Row' is to the left of the table with a bracket spanning all four data rows. A yellow box labeled 'Resize Handle' is at the bottom right of the table, pointing to a small square icon.

Item No	Item Name	Quantity
3231	Nail	100
532-A	Screwdriver	3
853ABU	Saw	2
03920	Self-sealing stem bolt	200

Table Cursors

The diagram illustrates six different ways to interact with a table using cursors:

- Select a cell:** A mouse cursor points to a specific cell (3231, Nail).
- Select a column:** A mouse cursor points to a specific column (Item No).
- Select a row:** A mouse cursor points to a specific row (3231, Nail, 100).
- Move/select table:** A mouse cursor with four arrows points to the top-left corner of the table.
- Resize column width:** A double-headed horizontal arrow cursor is placed over the vertical line between columns.
- Resize row height:** A double-headed vertical arrow cursor is placed over the horizontal line between rows.

Item No	Item Name	Quantity
3231	Nail	100
532-A	Screwdriver	3
853ABU	Saw	2
03920	Self-sealing stem bolt	200
